

SEMINAR
Topics in Environmental Geosciences

- 02.10.2017 **Prof. Dr. Wei Chen** (Nankai University) and **Prof. Dr. Don Zhu** (Peking University), China
Topic: *Role of carbonaceous materials in mediating environmental abiotic transformation of organic contaminants*
- 23.10.2017 **Dr. habil. Wiktor Kotowski**, Department of Plant Ecology and Environmental Conservation, University of Warsaw, Poland
Topic: *The miracle of fen mires: are we able to restore them as stable, self-sustaining and species-rich ecosystems?*
- 06.11.2017 **Prof. Dr. Rebecca Klaper**, School of Freshwater Sciences, University of Wisconsin – Milwaukee, USA
Topic: *Emerging contaminants as non-typical endocrine disruptors in freshwater systems*
- 20.11.2017 **Dr. Martha Gledhill**, Marine Biogeochemistry, GEOMAR Helmholtz Centre for Ocean Research, Kiel, Germany
Topic: *A holistic view of iron biogeochemistry in the ocean*
- 04.12.2017 **Dr. Vladislav Chrastný**, Department of Environmental Geosciences, Czech University of Life Sciences, Prague, Czech Republic
Topic: *Cr isotopes as a valuable tracer of Cr(VI) reduction in polluted (ground)waters*
- 08.01.2018 **Prof. Dr. Karsten Kalbitz**, Institute of Soil Science and Site Ecology, Technische Universität Dresden, Germany
Topic: *Does plant functional type affect chemical composition and degradation of peat along a temperature gradient?*
- 22.01.2018 **Prof. Dr. Bernadett Weinzierl**, Aerosol Physics & Environmental Physics Group, University of Vienna, Austria
Topic: *t.b.d.*
